Dear Customer,

Join us as we unleash the imagination of Siemens with exiderdome, an innovative industrial automation expo. This exciting hands-on environment gives you a unique opportunity to experience and find out more about the vital technologies that will transform the future of business.

In exiderdome, you'll see amazing products, systems and solutions designed to help you boost productivity and reduce costs, today and tomorrow.

Come to exiderdome and discover where state-of-the-art process and manufacturing automation and electrical infrastructure are headed. And unleash your own imagination.

➔ Fuseless Starters - 3RV1

Tired of searching for blown fuses in your panel?
Can't find a replacement fuse when you need one?
Want to build a smaller panel?
Want to reduce your costs to build your control panels?

If you answered "yes" to any of the above questions, then you need the 3RV1 Manual Starter Protector, certified as a Type E/F Manual Self Protected Combination Motor Controller from Siemens! The 3RV102, 103 and 104 Series of fuseless starters can solve these problems for you quite easily with many additional benefits!

➔ Mini-Circuit Breakers - 5SJ4

IEC style miniature circuit breakers (MCB) according to EN/IEC 60 898 are not always

Current/Surge Arrester has High Lightning Discharge

DEHNblitzductor XT is a combined lightning current and surge arrester consisting of a base and SPD module providing maximum protection for IT devices and systems, and has the highest lightning current discharge in its class. It offers effective protection for four active signal lines over a total width of only 12 mm. The universal base part can be used for any DEHNblitzductor XT module. Integrated LifeCheck® in the protective modules provides fast and easy testing of surge protection during operation. The SPD modules can be tested without causing downtime of the system and without removing the modules. The BLITZDUCTOR SPD product line is now CSA approved.

Ontor is the NEW National Distributor for FUSETEK

We are now a new Distributor for Fusetek across Canada for all Fusetek Products

Contact us for an exclusive MRO Plus fuse audit (Material Reduction Opportunity Plus)

permitted in North America.

For this reason, MCBs were developed to meet the special requirements of UL 489 and CSA22.2 No.5. The Siemens 5SJ4 Series of MCBs are certified as a solution for protective applications and can be used for branch circuit protection in the branches of control panels and systems.

➔ New Position Switches - 3SE5

Position Switches

Compact dimensions, modular design and easy device connection make our new standard position switches suitable for almost all applications.

Read more on [Standard Position Switches](#)

Safety Position Switches

Our complete program also includes the entire range of interlock gate switches for use in safety circuits. They facilitate reliable detection up to Category 4.

➔ New Solidstate Relays - 3RF

Designed for high operating switching frequency the SIRIUS 3RF2 Solid State Relays and Contactors feature a long lifespan of rugged reliability in adverse conditions, with quiet operation, physically compact sizes, and snap on function modules for convenient flexible use. The SIRIUS is available as a single phase or 3 phase device with a power voltage range of 24 - 600 VAC, 10 - 90 Amps.

Energy Savings with Drives

SIEMENS

Energy is valuable. Electrical power is the most important resource in industry and ensures that motors run, machines operate and plants manufacture. So it doesn't come as a big surprise that industry is responsible for 40 % of the total power consumption. However, it is surprising that the electrical drive systems are responsible for two thirds of that consumption. With an optimized design and dimensioning of plant and targeted selection of components, billions of dollars might be saved. Our SinaSave software tool can show you how fast an investment in an EFF1 energy-saving motor or a frequency drive amortizes.
